I'm not robot!

How to Compress PDF How To Compress PDF (Using Soda PDF) Compress PDF documents using Soda PDF. Learn the different ways to compress PDFs using our Desktop or Online software solutions, plus discover the different compression qualities we offer. Article link How to Compress PDF How To Compress PDF for Email Compress PDFs for email and send PDF documents to your recipients' email addresses in just a few clicks. Learn how to compress documents to shareable file sizes and send via email using Soda PDF. Article link How to Compress PDF How to Compress PDF Offline A desktop app such as Soda PDF Desktop can compress your files while maintaining their original quality and formatting, all while working offline. Article link Our powerful image compression tool that makes it easy to reduce the file size of different image files such as PNG, JPG, GIF, SVG, and more. Or select another language: If you need to send a PDF to yourself or someone else but it's too large to attach to an email, you can reduce PDF file size for free using our online PDF compressor without sacrificing the quality of your PDF files. No one else provides online PDF converter and PDF file compressor tools like ours, at no charge at all. Our software is a superior choice thanks to its ease of use, fast PDF document compression, and suite of useful tools to work with your PDF files with ease. After using our free PDF resizer, any remaining data will be permanently deleted from our servers with no residual copies retained, allowing you ample time to download your files before they are no longer accessible through our servers. We encrypt all PDF documents and other files uploaded to our servers using 256-bit encryption technology. We understand the importance of privacy and security, so we safeguard your sensitive PDFs and other file types using secure encryption technology. By using this encryption cipher, even the most powerful supercomputers, like Summit or Sierra, will have a tough time trying to brute-force their way through this cipher. As long as you have an Internet connection, you can access our PDF conversion tools and compress a PDF online free. Also, because our PDF size converter and tools are universal, you can upload and convert or compress PDF files from any device and operating system you might be using, from anywhere you happen to be. You can use our PDF file size reducer and other tools for free, or you may want to purchase a membership if you find yourself using our software frequently. By getting a membership, you immediately gain access to our PDF file compressor without wait time and can even download as many files as you want at one time. We have plenty of tools for whatever your PDF editing needs might be. We have your bases covered from merging and splitting, to rotation and conversion. With all of our PDF conversion tools, we provide the go-to solution for all your PDF editing needs. As the number of different file types have increased over the years we have seen new file types appear that range in size to such an extent that there's a need for users to be able to compress files. For example, we've all been at work and been sent a spreadsheet, document or presentation that has blown our mailbox. We've all visited websites that seem to take an age to load and that's because the images used on the site are unnecessarily large in size. Sometimes, there's a requirement to have the highest quality file possible - perhaps a wedding picture you want printed or a movie that you are airing. However, most of the time we want to be able to send files quickly and to also be able to consume them easily. This is why we have built the Zamzar compression tool. We are able to compress all different types of files - Images, Documents, Videos and Audio files - and allow users to make those files smaller whilst still retaining their overall quality. Just like our conversion tool, it is simple to use and can all be done online in an instant. Getting files from Drive Getting files from Dropbox Uploading file 0 of 0 Time left - seconds - Upload speed - MB/S Compressing PDF... Woops! Something is wrong with your Internet connection... How to compress a PDFjust drag-and-drop your PDF file in the box above, wait for the compression to complete and download your file. It's that simple.Security guaranteedYour files will be permanently deleted from our server after one hour. No one has access to your files and privacy is 100% guaranteed.All platforms supportedSmallpdf.com is browser-based and works for all platforms. It doesn't matter if you use Mac, Windows or Linux.Perfect qualityReduce your scanned PDF files to 144 dpi which is perfect for uploading files to the web and through email.Easy to useThe file size limit is 5GB. Even with large PDFs, it will take a few seconds for our compression tool to work its magic.In the cloudAll the file compressing takes place in the cloud and will not consume any capacity from your own computer. At a GlanceWorks in the backgroundSimple to useSome photos were low-resSome photos were low resSocialFolders makes it easy to create offline copies of your online data. I have photos stored on Facebook. I have spreadsheets stored in Google Docs. I have documents stored in Box. And I have videos stored on YouTube. Which is great-until I want access to these files when I'm offline. I could go to each site and download all of my files until I've amassed an offline collection of my stuff. Or I could just turn to SocialFolders, a service that offers an idea that's so simple-it syncs the content you have on your social sites to your desktop-I have to wonder why someone didn't think of it before. SocialFolders is both an application and a Web service: You download a component to your desktop, which creates a SocialFolders folder that you can access via Windows Explorer. Then you head to socialfolders.me, where you create an account and start connecting your social services. SocialFolders supports Box, Evernote, Facebook, Flickr, Google Docs, Instagram, Photobucket, Picasa, SmugMug, Twitter, and YouTube. (The free version of SocialFolders limits you to three services and 2,000 files; a Premium account, which costs \$10 per year, is unlimited.) SocialFolders organizes your Facebook photos into folders that correspond with your album names, and photo titles that correspond to your captions.Once you've connected SocialFolders to your social services, icons for each of them will appear in the SocialFolders folder that's been created on your computer. Subfolders for each of your connected services will automatically be created there, too. You can use SocialFolders's Web interface to determine how much information you'd like access to (all of your Facebook albums, or only a select few, for example), and the content you've chosen will be automatically downloaded to your desktop. You will need to make sure you have the storage to spare, though, as some of these files could take up plenty of disk space. SocialFolders is not only limited to downloads: It lets you upload files to your social sites, too. You simply create a folder in the SocialFolders directory on your desktop, and its contents will be automatically synced to your account. SocialFolders does more than just create a backup of your files. It also lets you access your friends' photos and files (as long as their privacy settings allow you to do so), and to create an offline copy of these documents, too. I found this a very handy way to grab photos of my nieces and nephews that my siblings share on Facebook. I did notice that some of the photos that SocialFolders downloaded for me looked to be slightly lower res than they appeared when viewed on Facebook, though. The company says that it does not change the resolution of photos when they're downloaded, but that it relies on the API of the social site itself. For example, SocialFolders uses Facebook's default upload API, which can reduce photo resolution. The company does note that most of the photo-sharing sites it supports lets users download photos in full resolution, though. Minor issue with photo resolution aside, I was quite impressed with SocialFolders. It offers a free and easy way to make sure you always have a backup of your precious online data. -Liane Cassavoy VEED works with all major video file formats (and audio formats too!) but here's a list of just a few of the file types we support. If you don't see yours on this list, don't worry, we support all major video and audio files, upload to see if yours works. ASF, AVI, FLAC, FLV, GIF, MOV, MKV, MOW, MP4, WEBM, WMV Services like Dropbox and Google Drive make it easy to store and share files across the web, but they have limitations. For instance, the free version of Google Drive only provides 15GB of storage (which is a lot for a free service) while the free version of Dropbox gives users a comparatively lacking 2GB of storage. If you need to transfer a huge file of more than 15GB (like an edited video file, for example) then neither one of these services will cut it. What you need is a dedicated service for transferring files. This article will walk you through several of the best ways to transfer large files online. We will also suggest a few ways to make shuffling huge amounts of data easier. We have covered some other services already, as well as some for sending large videos. We've also covered WeTransfer, a dedicated way of moving big files. MediaFire MediaFire is a cloud storage system that offers up to 50GB of free storage, with 1 TB of storage coming in at just \$3.75 per month. If you have the free plan, there's a maximum upload size of 20GB, but this restriction goes away with one of the paid options. MediaFire has apps on a variety of devices, so you can transfer large files online from your mobile devices as well as from a laptop. pCloud pCloud is a cloud storage service that has a dedicated file transfer system. That said, it's a fantastic option. There is no limit on upload size or upload speed. If you have fast internet, you can upload large files quickly without artificial bottlenecks placed by the service to conserve bandwidth. pCloud also provides multiple features that make it even more appealing, like the ability to spread your files across multiple services to keep them safe. pCloud offers a free trial so you can test out the service, but you will need to subscribe to continue using the service after this trial. Subscriptions are available in both monthly and yearly plans, but if you want to save money, go for the annual payment—it shaves off a few bucks overall. Masv Masv is the go-to service for people that need to transfer tremendously large files online. It's designed for videos, large graphics, and other types of media that are not email-friendly sizes. It's a popular service among video editors and freelancers because of the ability to move files larger than 20GB. Masv is also a bit different when it comes to pricing. Rather than a subscription model, Masv is a pay-as-you-go service. You will pay per gigabyte of data. While that might seem pricey, it actually helps cut down on wasteful spending because you are only paying for what you actually use. If you want to try out Masv, there is a seven-day free trial that gives you 100GB of free data transfers. It's a great way to test the service without committing to it. FTP If you're more tech-savvy than most, FTP clients are always an option. File Transfer Protocol is the old-school way of moving data around, but these days it is more focused on the business side of things. There isn't much call for consumer FTP use, which means the available options can be a bit on the complicated side. If you want to find out more, we have a dedicated FTP article you should look into. How To Make Transferring Files Easier Many people make the mistake of sending files in their raw formats, but that only makes the task more difficult. Here are a few tricks for reducing the size of huge files that will make them easier to transfer and save you a lot of hassle—without sacrificing the quality of the file itself. Compress Data By Zipping It There are multiple services available for turning a normal file into a .zip file. WinRAR and 7zip are both well-known not just for their storied history, but also because of the memes. Let's face it: the true 1% are those that paid for WinRAR. You can also compress data in macOS by selecting it, right clicking, and choosing Compress. Split Files Into Smaller Sections If you are transferring an unfinished file to an editor, ask if you can send the files in pieces. Breaking a two-hour video into 30-minute segments might result in 4 different files, but those files will be much smaller than a single entity. This is a particularly useful trick for someone with a finicky internet connection; the last thing you want is for the file to almost finish its transfer before a dropped connection tanks the entire process. Check The File Type Some file types are significantly larger than others due to resolution and quality. While there are times when you can't avoid high-resolution files, if it isn't strictly necessary then using a smaller file type might be an option. For example, JPG is such a popular format because it compresses the data to an extreme extent. The downside is that it also loses something in the process. On the other hand, TIF is a "lossless" format that doesn't result in artifacting—but the files won't be as small as JPG files. Paid Versus Free Services In the modern world, there are a huge number of services that allow you to transfer even gargantuan files for free. For the most part, there's no downside to using these services. A paid service does offer a few benefits that might appeal to you, especially if you want to keep things simple. Paid services also tend to have higher transfer rates and higher storage capacities. There is no right or wrong answer. If you need to transfer files between 15 and 20GB, you can likely use a free service, but larger than that will require a payment. Evaluate the best ways to transfer large files online and choose the one that's right for you.
